

I am writing with regard to your hearing on FM translators. I have been a K-LOVE listener for many years and support its religious ministry. I understand K-LOVE uses FM translators in many areas. K-LOVE offers an alternative to secular music, which is very uplifting and rewarding to many of us. It serves as an alternative to some of the bad news and negative ideas and comments we are subject to on a daily basis. It can be very uplifting for those in need.

I encourage you to let independent stations, such as K-LOVE continue to use FM translators to provide people in local communities with alternatives to music and moral values and information, such as is included on a daily basis on the K-LOVE stations. K-LOVE also offers an outlet for local information on community events that would otherwise be unavailable to groups, especially nonprofit, religious groups.
